eco230 

eco230

efficient LED technology
with long operating life

Mounting bracket and ground spike
made from V4A stainless steel -
corrosion-proof and non-breakable

The top-class „plug and play“-solution!

The **eco230** offers a unique atmosphere as well as safety in gardens, residential and business buildings, for the 230 V LED spot operates completely without external power supply. Simply fix the **eco230** in the desired position using the mounting bracket and the ground spike, insert the plug into the socket, done! With only 6 W, the LED of the **eco230** generates a remarkable light output of more than 400 lumen.

Sustainability and environmental protection start with quality products:

The **eco230** is manufactured in Germany, it is waterproof and features a turned, silver anodized housing. Mounting bracket and ground spike are made from corrosion-proof and non-breakable stainless steel. The integrated high-output LED offers a service life of more than 40,000 hours.

turned aluminium housing,
silver anodized

5m connection cable
with mains plug

Application areas

- Tree and plant lighting
- Facade and object lighting
- Lighting in monument protection
- Pathway lighting
- Architecture and garden accentuation
- Event lighting

Your advantages

- plug and play - all you need is a socket
- easy ground spike installation
- high-quality materials, made in Germany
- rotatable and pivotable at the mounting bracket
- energy-saving and durable LED technology

Technische Daten

Anwendung	Objekt- und Gartenstrahler - <i>object- and garden spot</i>	<i>usage</i>
Spannung / Leistung	230 V 50 Hz / 6 W LED	<i>voltage / power consumption</i>
Lichtleistung LED / Abstrahlwinkel	408 Lumen - <i>lumen</i> / 35°	<i>light output LED / beam angle</i>
Anschluss	5m Gummi-Kabel mit Stecker - <i>5m rubber cabel with plug</i>	<i>connection</i>
Schutzart / Schutzklasse	IP 67 / I	<i>IP rate / protection class</i>
Gehäuse	eloxiertes Aluminium - <i>anodized aluminum</i>	<i>housing</i>
Abmessungen	Ø 64 x 70 mm	<i>dimensions</i>
