

## 10646.00 LED Strip Mounting Extrusion

### TECHNICAL DATA

Material:	Extruded Aluminium
Finish:	Anodized
Dimensions:	Length - 2m, Profile - See diagrams below
Diffuser:	Frosted - Item No: 10647.00 Milky - Item No: 10641.00 Transparent - Item No. Clear 60° Lens - Item No: 10649
Compatibility:	12mm max. width LED Strip

Dimensions in mm

with 60° optic

Supplied complete with end caps (Item No. 10650.00 or 10651.00 for 60° optic) and mounting clips (Item No: 10645.00)

### INSTALLATION

Isolate the electrical supply before undertaking any electrical work.  
Installation must comply with the current wiring and building regulations

The extrusion can be mounted either in the clips provided, or drilled and screwed directly onto the surface.  
All screws in the extrusion must be fully countersink and any burrs removed.

Before fitting the LED Strip ensure the surface inside the extrusion is **completely free of dust and grease**.  
(If necessary to improve adhesion apply a very thin bead of clear adhesive [*Sikaflex EBT+*] under the LED Strip)
